

Oshmita Sarkar

✉ oshmitas.26@gmail.com 📍 Berlin, Germany 🌐 oshmita26 🔗 oshmita-sarkar-5ab04a216

Education

Kalinga Institute of Industrial Technology, Computer Science Odisha, India
2020 – 2024

Experience

Amazon Web Services, Software Developer Berlin, Germany
• Making AWS Consoles robust 2025 – present
1 year

Forma.ai, Analytics Engineer Pune, India
• Built and maintained analytics data pipelines for 10,000+ users 2023 – 2025
2 years

Metapix, AI Fellow George Town, Cayman Islands · Remote
• Chosen as one of the 30 AI Engineers for the Metapix Internship Programme. Mar 2023 – June 2023
4 months

Newron, Machine Learning Intern Remote
• Worked with Python and Optical Character Recognition (OCR). Dec 2022 – Feb 2023
3 months

FlixDrop CHMS, Data Science Intern Bengaluru, India
• Worked on various deep learning frameworks. Apr 2022 – June 2022
• Built an NLP-based chatbot using LSTM. 3 months

PlotMyData, Data Science Intern Remote
• Visualized streaming data using Python libraries (Bokeh, Streamlit). Jan 2022 – Mar 2022
• Worked on 3-D camera capture using the OpenCV library in Python. 2 months

Awards

Operational Excellence Award Aug 2026

Certificate of Merit Apr 2020

Inter-APS English Debating Championships Sept 2018

Excellence in Indian Classical Jan 2016

Merit Scholar Jan 2016

VVM Sastra Pratibha Apr 2015

Certificates

Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization	Mar 2022
Machine Learning and Image Processing	Dec 2021
Practical Machine Learning using R	Nov 2021
Structuring Machine Learning Projects	Nov 2021
Neural Networks and Deep Learning	Oct 2021
Visualizing Filters of a CNN using TensorFlow	Sept 2021
Introduction to Machine Learning	Aug 2021
Problem Solving (Intermediate)	Sept 2022
Problem Solving (Basic)	Sept 2022
Personify: Real Time Workforce Insight & Engagement	Jan 2022
Data Science Internship Programme	Jan 2022
Data Science	Nov 2021
Learn Python Programming Masterclass	Sept 2021

Projects

Music Recommendation Web App

This is a music recommendation engine that suggests songs to the user through an interactive UI, based on their past listening history. For the machine learning model, we have used KMeans Clustering Algorithm which is a type of unsupervised learning.

Medi-Assist

The project aims to develop a software that utilises ChatGPT to simplify complex medical jargons between patients and doctors. By taking the symptom as the input we have a detailed diagnosis and medication recommendations for the patient in the user interface. Based on that the doctor may add or remove stuff from there.

Bullying the bully

This project aims towards conserving anti-bullying rights on social media. It is built with the objective that users of social media are not a victim of cyberbullying or trolls online. We created a NLP based discord bot using the dataset we collected from Kaggle, that takes the recent texted message from the server, runs analysis and predicts if the text is offensive to any person on the server or not. If it finds the text offensive then it deletes the text and messages the Administrator of the server to block the person that sent the message.
