Education

Kalinga Institute of Industrial Technology, Computer Science Odisha, India
• Description 1. 2020 – 2024
• Description 2.

Experience

Amazon Web services, Software Developer Berlin, Germany
• Making AWS Consoles robust 2025 – present
1 year

Forma.ai, Analytics Engineer Pune, India
• Built and maintained analytics data pipelines 2023 – 2025
2 years

Volunteer

HackForClimate G20 Hackathon, Judge/Moderator Odisha, India
Lead organizer for the New York City branch of the People's Climate March, the largest climate Apr 2014 – July 2015
march in history.
• Awarded the 'Best Moderator' prize

Awards

Amazon Operational Excellence Award: 2026-08
Army Welfare Education Society - Certificate of Merit: 2020-04
Inter-APS English Debating Championships: 2018-09
The Velammal International School - Excellence in Indian Classic: 2016-01
The Velammal International School - TVIS Student - Merit Scholar: 2016-01
VVM Sastra Pratibha: 2015-04

Projects

Music Recommendation Web App

This is a music recommendation engine that suggests songs to the user through an interactive UI, based on their past listening history. For the machine learning model, we have used KMeans Clustering Algorithm which is a type of unsupervised learning.

Medi-Assist

The project aims to develop a software that utilises ChatGPT to simplify complex medical jargons between patients and doctors. By taking the symptom as the input we have a detailed diagnosis and medication recommendations for the patient in the user interface. Based on that the doctor may add or remove stuff from there.

Bullying the bully

This project aims towards conserving anti-bullying rights on social media. It is built with the objective that users of social media are not a victim of cyberbullying or trolls online. We created a NLP based discord bot using the dataset we collected from Kaggle, that takes the recent texted message from the server, runs analysis and predicts if the text is offensive to any person on the server or not. If it finds the text offensive then it deletes the text and messages the Administrator of the server to block the person that sent the message.
